

Use the potential of Microsoft® Project to your advantage with

scheuring project_{plus} 2000

EASY - EFFICIENT - RELIABLE

Project Planning and Controlling
Project Structuring and Reporting
ToDo Management

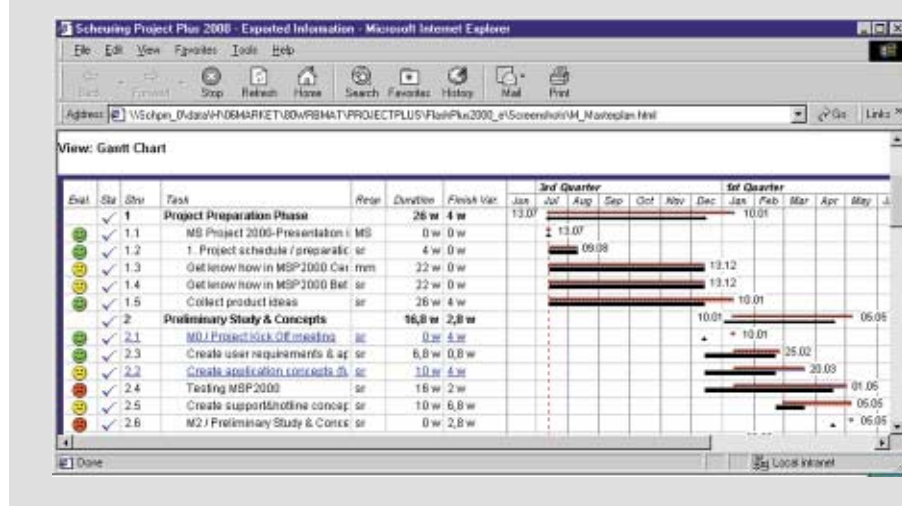

Need a flexible and user-friendly software to ensure the success of your projects in a timely and efficient manner? Project Plus 2000 streamlines Microsoft® Project and transforms it into a practical tool for the busy manager. In addition, Project Plus 2000 is the ideal tool for all project members to communicate their project status, results and plans.

- The tool that is already customized for project managers.
- Easy and intuitive handling.
- Be productive with the first click of your mouse, no customization or formatting needed.
- Promotes standardized planning and document formats.
- Project communication with web tools and Microsoft® Excel.
- Minimal training required; 1 day and you are on your way!
- Reduces your “internal” support.
- Fully compatible with Microsoft® Project
- In use for over 8 years with over 4000 satisfied customers!

PROJECT MANAGEMENT MADE EASY WITH THE CLICK OF YOUR MOUSE!

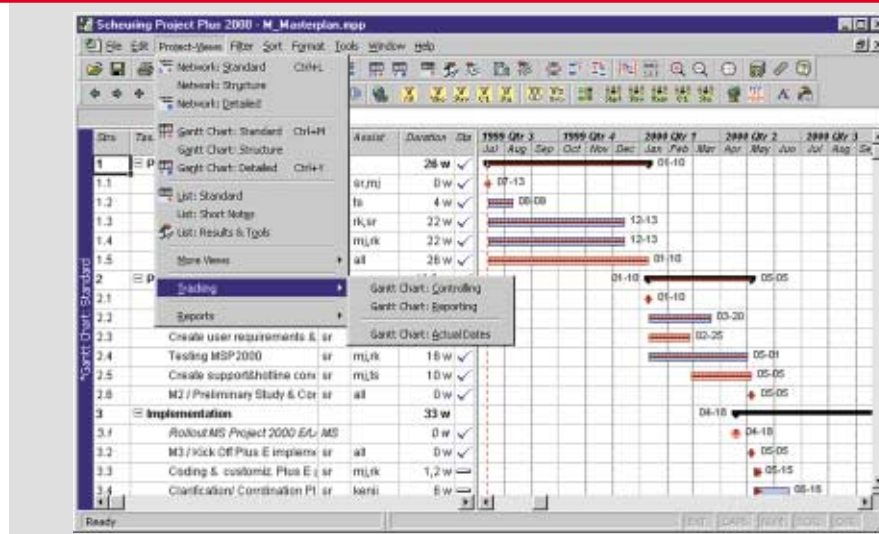

Create HTML files of any Project Plus View to be viewed via a web browser. HTML formats are a convenient alternative to communicating your project status without requiring the reader to have Microsoft® Project or Scheuring Project Plus installed on their PC.

- Create HTML documents of any Project Plus View with the integrated object generator.
- Virtually no effort needed to produce Gantt charts in HTML format for your project communications.

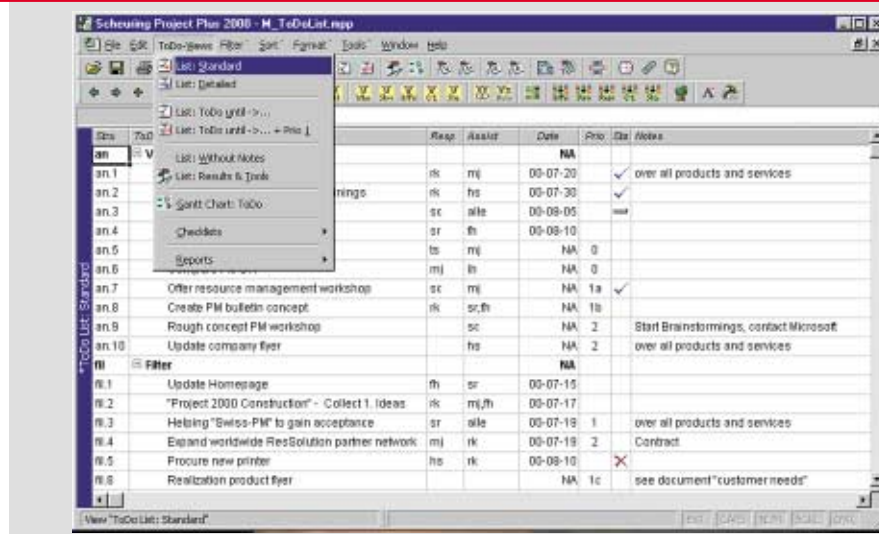

Clear and easy to understand menus and views – customized for you based on project managers experience.

- Use predefined formatted views.
- Filter information quickly.
- Group and sort project data.
- Show lag time in the Gantt chart with a simple on/off button.
- Combine, filter, sort and then report on project data.

Use the ToDo Mode to keep track of your open actions and issues, including responsables and due dates.

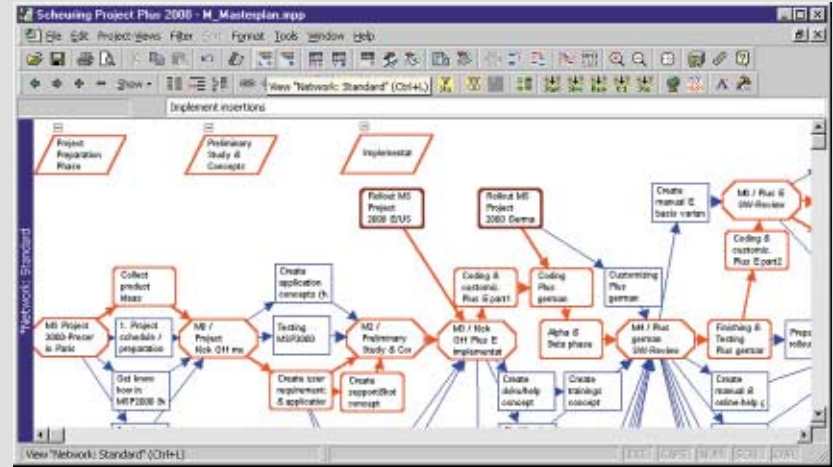

- ToDo lists by “Due By” dates and “Priority”.
- ToDo lists filtered by type of actions and/or issues depending on your addressees.
- ToDo lists to create reports in combination with your project plan.

CONVINCE OTHERS WITH THE CLICK OF YOUR MOUSE!

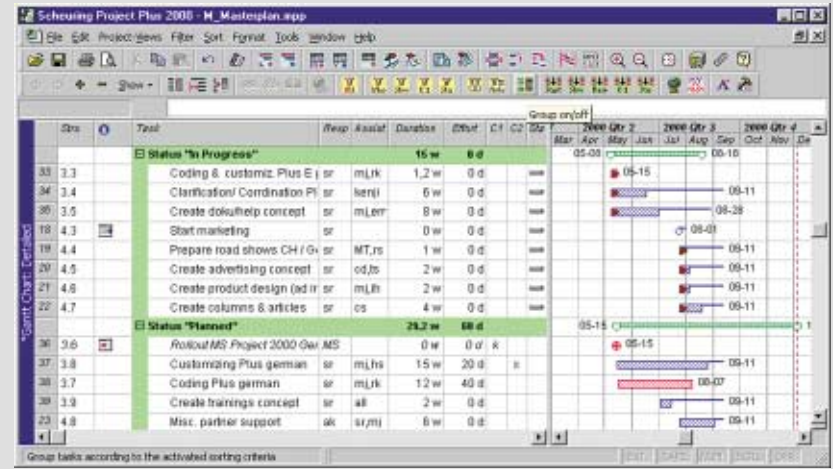

Use Network Diagrams to communicate your project plan.

- Use network diagrams to communicate transparent project and process structures.
- Create informative network diagrams with information relative to your audience and project.

The project plan can be grouped using various criteria which is of great value to planners and plan recipients.

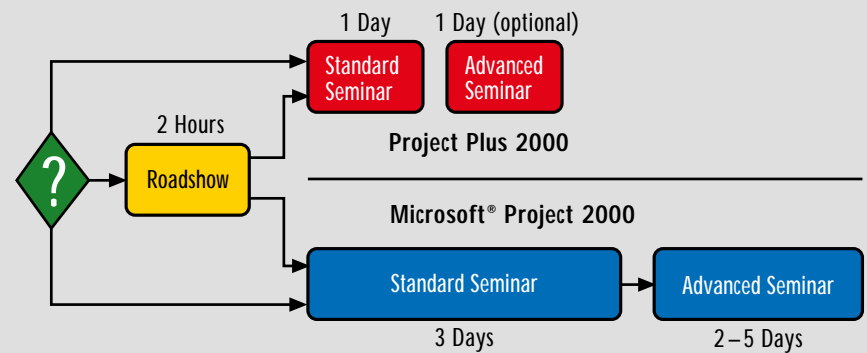

- Clear presentation of project structures.
- Attractive and informative presentation of diagrams.
